HoloCal™

Ultra-Micronized Calcium

HoloCal™ is a NOP-compliant, liquid concentrate that can be used in transplant solutions, irrigation systems, or as a foliar spray to correct calcium deficiencies that can lead to fruit disorders.

Features and Benefits

Our process used to make HoloCal™ is unique in that it creates a suspension that delivers an immediate, strong supplemental calcium source whether applied to the soil or as a foliar.

Using HoloCal™ can prevent many common fruit quality problems by building strong cell walls and enabling complementary nutrient flow to increase plant resistance to abiotic stressors. Calcium is a vital component of a sound fruit quality and storability program.

Application Rates and Timing

Fruits and Vegetables:

As a foliar and/or in fertigation, apply up to 1 gallon per acre at appropriate plant growth stages.

Broad Acre Crops:

As a foliar, apply up to 1 gallon per acre at appropriate plant growth stages.

Soil Drench or Row Starter:

Apply up to 1 gallon per acre on all crop types at appropriate plant growth stages.

Nutritional Supplement Makeup

HoloCal™ is a non-synthetic blend of a uniquely processed, natural source of calcium carbonate valuable to many crops for improving plant vigor, fruit quality, and storability.

More Information

While HoloCal™ can be as a standalone application, it has been designed to be used along with complementary products as part of an overall fertility program to produce the highest quality results.
