MacroPak™

A Liquid Macronutrient Application

MacroPak is intended to provide a foundation of macronutrients that drive the vegetative growth needed to build a strong plant frame that can support large yields, strong photosynthesis, and immune system development.

Features and Benefits

- Provides macronutrients needed for nutritional integrity
- Increases production of plant secondary metabolites
- Increases a plant's capacity for optimal fruit and seed set
- Supports nutritional integrity during periods of peak plant demand and improves resistance to abiotic stressors
- Improves plant nutrient mobility and uptake
- Encourages larger, stronger roots and better the plant immune response

Nutritional Supplement Makeup

MacroPak™ represents a significant advancement in nutrient delivery and efficacy. With MacroPak™, you can expect enhanced nutrient uptake and balanced nutrition for your crops, ensuring robust growth and bountiful yields. Ingredients include:

- Corn steep powder
- Calcium silicate
- Magnesium sulfate
- Kelp extract (potassium hydroxide)

Application Rates and Timing

Fruits and Vegetables:

Foliar: 1-8 quarts per week

Irrigation: Apply 1-8 quarts each per acre every 5-14 days, or as needed

Broad Acre Crops:

In-row: 2-12 quarts per acre

Foliar: 1-6 quarts per acre every 3-4 weeks, or as needed

More Information

While MacroPak™ can be used as a standalone application, it has been designed to pair with MicroPak™ and other complementary products as part of an overall fertility program to produce the highest quality results. If you are currently not taking advantage of AEA's Farm Services, please call (800) 495-6603.
