# SeedFlare™

## Mineral Nutritional Seed Treatment

SeedFlare™ is a NOP-compliant nutritional seed treatment, designed to provide trace minerals directly into the seed to stimulate rapid germination and emergence.

### Features and Benefits

- Increase seedling chlorophyll content immediately after germination
- Improves root colonization of beneficial microorganisms
- Increase the number and size of reproductive buds
- Increase the size of reproductive bud-associated leaves, which can increase fruit or grain size

### Contains:

- Magnesium sulfate
- Zinc sulfate
- Manganese sulfate
- Iron sulfate
- Copper sulfate

### Application Instructions

Spray SeedFlare™ directly onto the seed without diluting it with water to avoid softening the seed. Seed can be treated well ahead of planting. SeedFlare™ can be applied to seed well in advance of planting without negatively affecting seed firmness or storability.

### Rates:

2 – 8 quarts per ton of seed  
1.6 – 6.4 ounces per 50 pounds of seed  
1 – 3.75 milliliters per pound of seed

### More Information

While SeedFlare™ can be used as a standalone application, it has been designed to be used along with complementary products, such as BioCoat Gold™, as part of an overall fertility program that will produce the highest quality results.
